Modular Carrel

Computer Table

Characterized by square, butcher-block styling, the angular design is contemporary, yet enduring.

- > Jointed corners provide not only an alluring quality, but also a well-engineered furniture choice.
- > Tables feature a solid wood external band and are available in square, round or rectangular leg-based styles in a full range of sizes.
- > All table tops can be outfitted with aesthetically pleasing concealed power strips or power fixtures for fixed lighting applications. A hollow leg is available for concealing power cables.

Square Table

Round Table

Occasional Table

Occasional High Table

- > The collection includes matching carrels offered with a number of options including lights, finish, wire management and grommets.
- > Buckstaff solid wood shelving is available in single or double-faced.
- > Include features such as newspaper rods and sloped periodical shelves.
- > For a complete look, Buckstaff offers a wide selection of matching technically library pieces such as book trucks, circulation desks, atlas cases and computer workstations.

Helicoil

Helicoils are used for maximum holding power.

Slug & Bolt

Slug-and-bolt leg assembly provides strength and stability with metal-to-metal fastening.

BUCKSTAFF

MOSS DESIGNS LTD.

continuing a 160 year tradition

About Us

Creating a new team from the old Buckstaff organization, the new company consists of experienced craftsmen and longterm employees of the original Buckstaff company. The new parent organization is Moss Designs Ltd., which is a woman owned business started by Buckstaff employees over 10 years ago. While we're a different firm from Buckstaff, we understand the importance of producing durable quality wood furniture made in America.

Beyond hiring experienced Buckstaff employees, we're looking at adding on and improving the Buckstaff experience:

- > We've purchased Buckstaff's furniture drawings, specification standards, engineered parts, patents and trademarks.
- > Acquired some of their operational furniture manufacturing equipment.
- > Currently, we're re-establishing long-time vendor relationships.
- > We use the same wood supplier and the same aged kiln dried wood species that Buckstaff was famous for.
- > Our finishing team employs the same processes that were used at Buckstaff. In fact, we purchased their wood staining and varnishing equipment to provide perfect matches.

Environmental Statement

The majority of our wood comes from Wisconsin lumber dealers. They strongly believe in long-term forest management and use certified forest experts in the tree selection process. They believe in working closely with land owners to help them keep forests sustainable. The wood they harvest is usually found less than 25 miles from their mill.

Buckstaff utilizes water based stains which reduces VOC emissions. Blanket wrapping, when feasible, eliminates packaging materials that end up as waste in landfills. When you order from Buckstaff you should feel comfortable knowing we take our environmental commitment seriously.
